4 FIRST AID MEASURES

Inhalation: Remove to fresh air. If breathing has stopped, apply artificial respiration. If breathing is difficult, give oxygen provided a qualified operator is available. Seek medical attention.

Skin Contact: Remove contaminated clothing and wash contaminated skin with large amounts of soap and water. If irritation persists, seek medical attention. Launder clothing before reuse.

Eye Contact: Flush eyes with large quantities of water for 15 minutes and seek medical attention.

Ingestion: If swallowed, induce vomiting of conscious patient immediately by giving two glasses of water and pressing finger down throat. Drink a large amount of water, milk or sodium bicarbonate to dilute material in stomach. Contact the Poison Control Center, emergency room or physician immediately.
FIRE FIGHTING MEASURES

Flammability: Handle as a flammable liquid. Vapors form an explosive mixture in air between the LEL and UEL which can be ignited.

Flash Point: 95 F
Flash Point Method: Tag Closed Cup
LEL: 6.7%
UEL: 36.5%

Fire Fighting Instructions:
Use water spray to cool fire exposed containers and to prevent pressure or possible explosion when exposed to extreme heat conditions. If water is used, fog nozzles are preferred.

Extinguishing Media:
Dry chemical, carbon dioxide or foam.

Fire and Explosion Hazards:
Handle as a flammable liquid. Vapors are heavier than air and may travel along the ground and moved by ventilation. Vapors form an explosive mixture in air between the LEL and UEL.

Protective Equipment:
Wear NIOSH approved self-contained breathing apparatus with full face piece and protective clothing for skin and eye contact.

ACCIDENTAL RELEASE MEASURES

Small spill: Use vermiculite or other absorbant material to collect liquid.

Large spill: Eliminate all ignition sources. Contain run-off with absorbant materials such as sand, clay or diking. Transfer liquid and absorbant material to an approved container. Keep spill out of sewers or any access to bodies of water. If run-off occurs, notify proper authorities as required.

HANDLING AND STORAGE

Handling Precautions:
Use approved NIOSH respirator when necessary.
Provide sufficient ventilation.
Wear appropriate impermeable gloves.
Use chemical safety glasses, goggles or face shield for eye protection.
Long sleeves and apron are recommended.
Avoid prolonged or repeated contact with skin.

Storage Requirements:
Store upright with a tightly closed cap.
Store in a cool, dry and well ventilated area.
Keep away from sparks, heat and open flame.
8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Use adequate ventilation, especially in confined spaces

Personal Protective Equip: Chemical splash goggles
Face shield
Neoprene gloves
NIOSH approved respirator
Apron
